Welcome to Our New Movement Disorder Specialist

NeuroMotion Telehealth is proud to welcome Dr. Maria Cristina Ospina, a Movement Disorder Specialist based in Phoenix, Arizona, to our growing national team.

Dr. Ospina brings specialized expertise in the diagnosis and treatment of Parkinson's disease, tremor, dystonia, atypical parkinsonism, and other movement disorders. Her addition strengthens NeuroMotion's mission to provide highly specialized, compassionate neurological care to people who may otherwise have limited access to movement disorder expertise.

She is licensed to see patients with movement disorders in:

Arizona • Florida • Wisconsin • Louisiana

**As she continues to see Medicare patients at her private practice in Arizona she is only able to see NON-Medicare patients through NeuroMotion.*

Together, our team is expanding access to expert movement disorder care across the country through thoughtful, responsive telehealth.
